The Graduate visa route launches in Summer 2021. This new visa route allows you to stay in the UK for 2 years following successful completion of your studies at London Business School.

**What are the requirements?**
- You must have a valid Tier 4 visa at the time of applying
- You must have successfully completed your LBS degree
- You must not have previously held a Graduate visa
- You must have completed your studies in the UK*

*EMBA Dubai and EMBA Global students do not meet this requirement

**What can I do on the visa? What can’t I do?**
- You can stay in the UK for 2 years
- You can work – either employed or self-employed
- You can move employers
- You do not require sponsorship
- You cannot work as a professional sportsperson, or as a doctor or dentist in training.
- You can switch to other work visas (if eligible) at any time during the 2 years.
- You can’t extend the visa

**How do I apply?**
We are awaiting confirmed details of the application process, but we currently understand the following will be required.
- You will make a new visa application online while in the UK before your Tier 4 visa expires
- You will attend a biometric appointment in the UK to complete the application
- There will be an application fee (rate TBC)
- You will have to pay the Immigration Healthcare Surcharge (rate TBC)
- LBS will confirm to the Home Office that you have successfully completed your studies

**Family members**
- If you have family members – spouses, partners or children – who currently have visas as your dependents, they can apply for new dependent visas to stay with you in the UK.
- They remain able to work or study.
- If you have family members not already in the UK as your dependents, they will **not** be able to apply to be dependents during your time on the Graduate visa. They would first have to apply as your Tier 4 dependents, then apply again as your Graduate dependents.

**Questions?** Our expert visa team is happy to answer any questions you have. Email us at visas@london.edu
